

Government Hosted Case Management System (CMS)

Case management system Interfacing

1. The government own and hosted Case management system will be the centralized program participant repository used by all MC&FP programs that require CMS services. The web based application will be used by multiple contractors simultaneously.
2. **MC&FP will**
 - 2.1. Manage the CMS hardware and Software.
 - 2.2. Maintain a helpdesk to support CMS users.
 - 2.3. Augment and implement new data and business processes for emerging programs.
3. **The Contractor shall**
 - 3.1. Record case information in this CMS
 - 3.2. Be responsible for the exchange of the information with the provider network.
 - 3.3. Record quick call contacts into the CMS.
4. **Typical information flow for a call center event.**
 - 4.1. Call center answers the phone call
 - 4.2. Call center determines caller basic needs
 - 4.3. Call center start a case or logs a Quick Call Contact. (MOS UI)
 - 4.4. Participant gets counseling from provider
 - 4.5. Provider provides case information to contractor (See CAR)
 - 4.6. Contractor validates provider data
 - 4.7. Contractor updates Government CMS with validated case data. Using either manually with the on-line interface (MOS UI) or through the government CMS XML input feed. (CAT XML Feed)
